EDUCATION

Università di Genova

2023-2026

Arak university of technology

2019-2023

Master of **Robotics**
Engineering

Bachelor of **Mechanical**
Engineering

EDUCATION

I earned my Bachelor's degree in **Mechanical** Engineering with a specialization in Automatic Control from Arak University of Technology. My undergraduate thesis focused on the design, calculation, and construction of a robotic gripper arm capable of picking up and moving objects.

Currently, I am pursuing my Master's degree in **Robotics** Engineering at the University of **Genova**. I have completed all my coursework, and my thesis remains to be finalized, which I can complete once I begin working on it.

I am highly passionate about industrial design of mechanical and robotic components and enjoy developing innovative ideas. In addition, I continuously enhance my skills in Artificial Intelligence, Machine Learning, and Python programming to complement my engineering expertise.

WORK EXPERIENCE

3D DESIGNER, MAPPING BY CATIA, SOLIDWORKS & Creo, LEADERSHIP

Worked as a project designer and supervisor. Led the design and implementation of a 2D (X, Y axis) iron rod cutting machine, developed upon company request. The machine was successfully built and delivered to clients.

HONORS & AWARDS

Designing the Logo of ARIAN ROBOT Company (2020) - Designing & **Running** Robotic Arm "ARIAMA" (2020)

Wining the Chemical Car & Line Follower Car **Competition** (2016-17) – **Build an industrial** cutter machine (2022) – Wining the 4th rank of **researching** "Fish Farming" (2021)

MEMBERSHIP

Membership in Science & Technology Park

INTERESTS

Robotics — Working on AI – New ideas —Team working - Researching - Creativity - 3D Designing - 2D Designing & Mechanical drawing
